Security Report Summary

A

Site:	https://wordpress-1545457-5979331.cloudwaysapps.com/
IP Address:	138.197.24.34
Report Time:	24 Apr 2026 15:23:53 UTC
Headers:	✔ Strict-Transport-Security ✔ Content-Security-Policy ✔ X-Frame-Options ✔ X-Content-Type-Options ✖ Referrer-Policy ✖ Permissions-Policy
Advanced:	Great grade! Perform a deeper security analysis of your website and APIs: Try Now

Missing Headers

Referrer-Policy	Referrer Policy is a new header that allows a site to control how much information the browser includes with navigations away from a document and should be set by all sites.
Permissions-Policy	Permissions Policy is a new header that allows a site to control which features and APIs can be used in the browser.

Raw Headers

HTTP/2	200
server	nginx
date	Fri, 24 Apr 2026 15:23:52 GMT
content-type	text/html; charset=UTF-8
content-length	37581
strict-transport-security	**max-age**=31536000; **includeSubDomains**
content-security-policy	**frame-ancestors** 'self';
x-frame-options	**SAMEORIGIN**
x-content-type-options	**nosniff**
link	<https://wordpress-1545457-5979331.cloudwaysapps.com/wp-json/>; rel="https://api.w.org/", <https://wordpress-1545457-5979331.cloudwaysapps.com/wp-json/wp/v2/pages/13>; rel="alternate"; title="JSON"; type="application/json", <https://wordpress-1545457-5979331.cloudwaysapps.com/>; rel=shortlink
vary	Accept-Encoding
content-encoding	gzip
x-robots-tag	noindex, nofollow

Upcoming Headers

Cross-Origin-Embedder-Policy	Cross-Origin Embedder Policy allows a site to prevent assets being loaded that do not grant permission to load them via CORS or CORP.
Cross-Origin-Opener-Policy	Cross-Origin Opener Policy allows a site to opt-in to Cross-Origin Isolation in the browser.
Cross-Origin-Resource-Policy	Cross-Origin Resource Policy allows a resource owner to specify who can load the resource.

Additional Information

server	This Server header seems to advertise the software being run on the server but you can remove or change this value.
strict-transport-security	HTTP Strict Transport Security is an excellent feature to support on your site and strengthens your implementation of TLS by getting the User Agent to enforce the use of HTTPS.
content-security-policy	Content Security Policy is an effective measure to protect your site from XSS attacks. By whitelisting sources of approved content, you can prevent the browser from loading malicious assets. Analyse this policy in more detail. You can sign up for a free account on Report URI to collect reports about problems on your site.
x-frame-options	X-Frame-Options tells the browser whether you want to allow your site to be framed or not. By preventing a browser from framing your site you can defend against attacks like clickjacking.
x-content-type-options	X-Content-Type-Options stops a browser from trying to MIME-sniff the content type and forces it to stick with the declared content-type. The only valid value for this header is "X-Content-Type-Options: nosniff".
