Security Report Summary

D

Site:	https://borchers.com/
IP Address:	162.241.225.108
Report Time:	24 Apr 2026 15:24:09 UTC
Headers:	✔ Content-Security-Policy ✔ Referrer-Policy ✖ Strict-Transport-Security ✖ X-Frame-Options ✖ X-Content-Type-Options ✖ Permissions-Policy
Warning:	Grade capped at A, please see warnings below.
Advanced:	Your site could be at risk, let's perform a deeper security analysis of your site and APIs: Start Now

Missing Headers

Strict-Transport-Security	HTTP Strict Transport Security is an excellent feature to support on your site and strengthens your implementation of TLS by getting the User Agent to enforce the use of HTTPS. Recommended value "Strict-Transport-Security: max-age=31536000; includeSubDomains".
X-Frame-Options	X-Frame-Options tells the browser whether you want to allow your site to be framed or not. By preventing a browser from framing your site you can defend against attacks like clickjacking. Recommended value "X-Frame-Options: SAMEORIGIN".
X-Content-Type-Options	X-Content-Type-Options stops a browser from trying to MIME-sniff the content type and forces it to stick with the declared content-type. The only valid value for this header is "X-Content-Type-Options: nosniff".
Permissions-Policy	Permissions Policy is a new header that allows a site to control which features and APIs can be used in the browser.

Warnings

Content-Security-Policy	This policy contains 'unsafe-inline' which is dangerous in the default-src directive. This policy contains 'unsafe-eval' which is dangerous in the default-src directive.

Raw Headers

HTTP/2	200
date	Fri, 24 Apr 2026 15:24:08 GMT
server	nginx/1.27.2
content-type	text/html; charset=UTF-8
last-modified	Fri, 24 Apr 2026 10:52:01 GMT
cache-control	max-age=7200
expires	Fri, 24 Apr 2026 17:24:07 GMT
vary	Accept-Encoding
content-encoding	gzip
host-header	c2hhcmVkLmJsdWVob3N0LmNvbQ==
x-newfold-cache-level	0
x-endurance-cache-level	2
x-nginx-cache	WordPress
access-control-allow-methods	GET,POST
access-control-allow-headers	Content-Type, Authorization

Additional Information

server	This Server header seems to advertise the software being run on the server but you can remove or change this value.
content-security-policy	Content Security Policy is an effective measure to protect your site from XSS attacks. By whitelisting sources of approved content, you can prevent the browser from loading malicious assets. Analyse this policy in more detail. You can sign up for a free account on Report URI to collect reports about problems on your site.
cross-origin-embedder-policy	Cross-Origin Embedder Policy allows a site to prevent assets being loaded that do not grant permission to load them via CORS or CORP.
cross-origin-embedder-policy-report-only	Cross-Origin Embedder Policy allows a site to prevent assets being loaded that do not grant permission to load them via CORS or CORP.
cross-origin-opener-policy	Cross-Origin Opener Policy allows a site to opt-in to Cross-Origin Isolation in the browser.
cross-origin-opener-policy-report-only	Cross-Origin Opener Policy allows a site to opt-in to Cross-Origin Isolation in the browser.
cross-origin-resource-policy	Cross-Origin Resource Policy allows a resource owner to specify who can load the resource.
	Referrer Policy is a new header that allows a site to control how much information the browser includes with navigations away from a document and

referrer-policy	Referrer Policy is a new header that allows a site to control how much information the browser includes with navigations away from a document and should be set by all sites.
x-content-security-policy	X Content Security Policy is required for CSP support in IE 10 and IE 11. For other modern browsers the Content-Security-Policy header should be used.
